5 Keys to Managing Risk

Knowing how and when to manage risk can help you make smarter trading decisions and reach your goals. Here are five key things you can do to help manage risk when trading stocks:

- Diversify your portfolio
- Balance your capital allocation
- Consider using stop orders
- Monitor market volatility
- Trade with a clear head

Try our free [Engaging the Stock Market](#) course for more on how to use these techniques to manage risk.

How to Manage Your Stocks

Keeping an eye on your stocks is easy on the tastytrade platform. The [Positions](#) tab shows which stocks you own, how many shares, and their current price. You can also view data like your current profit/loss and total portfolio value to help you make informed decisions all in the same view. For a quick tutorial on managing your active positions, check out our [Placing Stock Trades](#) course.
